TEXAS INSTRUMENTS

STEVE

August 15, 1984

Mr. Ivan Weich
10195 Parkdale Avenue
San Diego, CA 92126

Dear Mr. Weich:

Thank you for taking the time to write concerning the
availability of Texas Instruments 99/4A Peripheral
Equipment.

Effective April 1, 1984, Texas Instruments is no longer
selling products for the TI-99/4A Home Computer. However,
many Texas Instruments retailers still have products in
stock. Although availability is limited in certain areas of
the country, you might wish to check with your local
retailers. In addition, there are a number of retailers who
sell many of our home computer products nationwide. If you
are unable to find peripherals locally, you may wish to try
companies such as the following:

Triton	800/227-6900
Unisource Electronics	800/858-4580
Tenex	800/348-2778
Elek-Tek	800/621-1269

Quantities of Texas Instruments peripherals and accessories
are limited. However, we can now provide a listing of many
third-party suppliers to assist you. While the enclosed
list is not comprehensive, we do feel that it is a means for
additional enhancement for your system. Please keep in mind
that Texas Instruments cannot assume responsibility for the
quality or compatibility of any of these products.

Mr. Weich, we appreciate the patience and understanding you
have shown in the past months. We want you to know that we
are very much committed to providing continued support to
all our customers. If we may be of further assistance or if
you have further questions or comments, please write again
or call a Consumer Representative toll-free at 800/TI CARES.

Sincerely,

Mark Turner
Consumer Relations

PRINTERS

    There are numerous companies advertising printers which
    can be used specifically with the TI-99/4A, but in
    reality, almost any printer which can be interfaced
    via the RS-232 serial or Centronics parallel methods
    can be used by means of the appropriate cable
    obtainable from one or more of the vendors in the
    "CABLES, SUPPLIES, & MISCELLANEOUS" section below.
