# Software Catalogue

THIRD EDITION

INTRIGUE  
SOFTWARE

Games to remember

50p

We specialise in writing games of the highest quality for the TEXAS TI-99/4A Computer.

Our games are packaged in AUDIO WALLETS with full colour printed cover pictures. The instructions are very detailed in clear and precise English so that you the games player can get the maximum value for your money.

Each program is recorded professionally on both sides of an Aqfa PE 619 cassette. In the unlikely event that your copy will not load we promise to exchange it for another copy of the same program as quickly as possible.

We want you to enjoy INTRIGUE SOFTWARE as much as thousands of other TI players, probably even as you read this catalogue.

We offer you a very fast mail order service. When you purchase direct from us you will receive your game in just a couple of days.  
**MAIL ORDERS ARE DESPATCHED SAME DAY.**

We also supply directly, a network of dealers. Our games may be available from your local computer shop.

**WHEN YOU PURCHASE AN INTRIGUE SOFTWARE GAME YOU BUYING THE VERY BEST AVAILABLE ON CASSETTE.**

Many players who have purchased an INTRIGUE game now own the complete set.

Just think, . . . For the price of one cartridge you can buy up to four of our games!

WE have a range of games to suit everyone. If you enjoy graphic and text Adventures you should get a great deal of entertainment from ours. They have been designed to allow you play without being stuck in one place forever. But they are very challenging. Even if you sneak a little look at the program you will still be none the wiser (we hope). Adventuremania for example took Mr Davis of Sheffield 150 hours to score 63%. Then with a little help from us he succeeded. He promptly purchased a copy of Mania, more sleepless nights were in store. Our Adventures give very good value.

If you like arcade Adventures, that is games with animated graphics you might like to try your hand at ATLANTIS. This really is the biggest game available and there is a secret to discover.

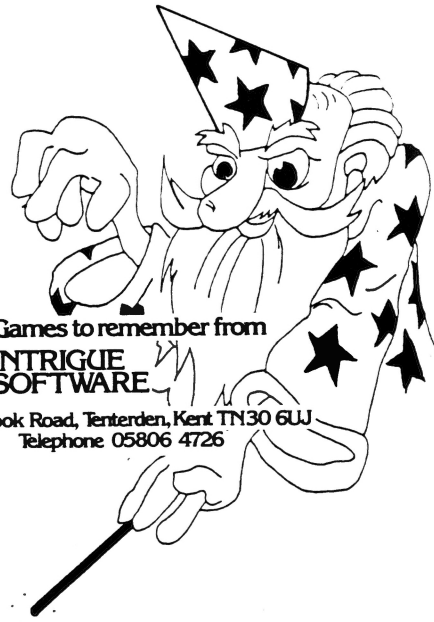

The last type of game we offer you is the pure Arcade game. Beneath the Stars is just that. Full of action you will find it hard to stop playing.

Whatever type of game you like INTRIGUE have at least one game to offer. Remember we do not import games, we write them. We know what we are selling to you.

Games to remember from  
**INTRIGUE  
SOFTWARE**

Cranbrook Road, Tenterden, Kent TN30 6JJ  
Telephone 05806 4726

We are constantly releasing new games so do look at our advertisements in Home Computing Weekly

If you have written an original game why not send us a copy for evaluation. If your game is good we will offer to buy it from you...

Who knows perhaps your skill will reward you very well, allowing you to buy those extra luxuries.

On another subject...

We all know that some people copy games for their friends. This is not really in there own interests for the following reasons.

If the software houses do not sell enough copies of their games they go out of business. On your computer there are few Software Houses left. We ask you not to offer or accept counterfeit copies. If someone does either offer or sell you a counterfeit copy, then let us know.

With your help we can make sure that when you purchase our games they are truly ours.

Our packaging is unique to us. No other Company uses our Full colour system for the cover picture. All of our games are in wallets

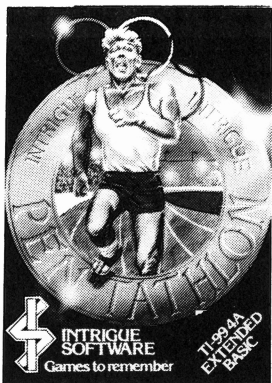

I hope you enjoy our catalogue and look forward to a long and happy association with all Texas owners.

*Dennis Webb*

# INTRIGUE PENTATHLON

TI-99 4A  
EXTENDED  
BASIC

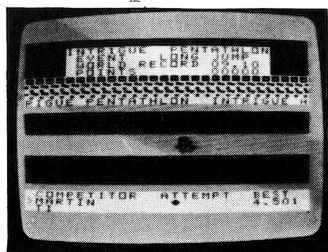

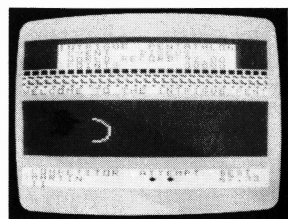

Welcome to the INTRIGUE PENTATHLON. 5 events packed full of action for ONE or TWO PLAYERS. This athletic event is so animated the athletes muscles even bulge in their arms as they run.  
FEATURES: Enrol, Choose your athletes colours, Select event, you may even train in single events if you wish, or compete in the Pentathlon.

**TAKE YOUR MARKS** for the track events. The first screen shot shows the two athletes ready for the OFF. You will need to be fit to win this quelling event. Nothing is chance the best athlete always wins. Can you break the World Record?

## NOW FOR THE DISCUS EVENT.

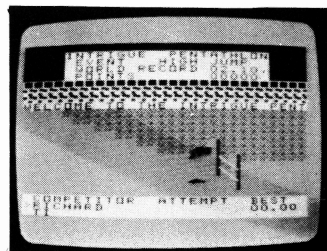

The screen shot shows the athlete building up for what might be another World Record. As he swings backwards and forwards he gets closer to the line. If he steps on the line its a Foul throw, but the closer he gets the harder he might throw. Just like the real thing. When you throw the discus you must throw it at the best angle to get a long throw. You will even see a shadow chasing across the grass as the discus floats high in the air.

**THE LONG JUMP** (everyone tries to jump off the screen...) When your athlete is as close to the line as you dare, he will jump at your command. Once again dont expect to break the record first time. Our athletes are a bit human to... Just like the real thing you must jump at the best angle. But be careful not to step on the take off board. You get three attempts here.

## THE HIGH JUMP (Our favourite)

Here we go again. Each athlete runs up to the bar and at your command leaps, once in the air you may make him turn on his back, lay horizontal with his legs hanging down, lift his legs up and finally land on his feet. If you successfully clear the bar it gets raised for another go. You get three attempts.

# ATLANTIS

1984

## SOFTWARE REVIEW from Games Computing January 1985

This Graphics adventure features no less than 85 different screens, through which you must discover the secret of Atlantis.

Following hard on the heels of Adventuremania and Mania, Atlantis is the latest offering from Intrigue Software.

Operating a smoothly animated diver controlled by keys or joystick through eight different diving angles, the player collects points by obtaining treasures from various locations, eventually discovering the secret tomb of Atlantis.

In playing you are faced with planning direction and the conservation of oxygen, whilst avoiding losing lives by being bitten by lively sharks and squid, or bumping into rocks.

The diver rotates anticlockwise with Q key or left joystick, clockwise by P key or right joystick. Key A and joystick forward make him speed ahead, space bar and joystick back stop him.

Sixteen graphic shapes in the program, ensure the diver's authentic swimming movements in the water, adding to the adventure's realism. While you are bust selecting which way your diver will fin next, oxygen is being consumed, as the emptying bubble gauge shows on the lower part of the screen. Need more oxygen? Fin up to the surface and recharge the bubbles. This simple sounding solution becomes a problem as in real diving, because as you go deeper, your oxygen limits your progress. While there are oxygen bot-

ties to refill from at strategic points, you can enter the wrong cavern. . .

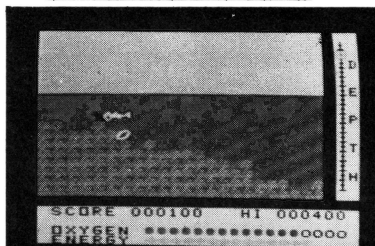

The energy bar giving eighteen lives is reduced by shark or squid attacks or by hitting any underwater obstacles, or making the wrong decision about an oyster. This bar is displayed below the bubble gauge, together with continual and hi scores. Diving deeper, the depth gauge shows vertically on the right of the screen. Collecting gems and pearls in the correct sequence gives oxygen bonuses which are also essential to discover the secret.

So far, only three players have solved the adventure, so I shall be playing Atlantis for some time still.

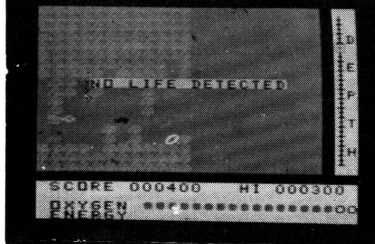

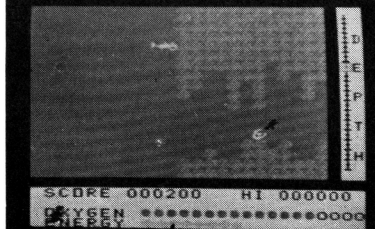

The Texas owner will welcome action and adventure such as Atlantis which is not beset by clues, and gives satisfying success by dive planning. Atlantis, because of programming techniques used, loads in just under eight minutes with screen title changes.

Intrigue have utilised the 16K Basic almost to the last byte, setting a new standard which will be difficult to follow, especially with the animation of the diver and other denizens of the deep.

Atlantis is very well presented, with a full colour cover and audio wallet, and comprehensive instructions. It is an adventure for all the family, if you let them get near it!

\* ACTUAL SCREEN PICTURES \*

Over 80 different scenes to flip and flap around in. You will be gripped in suspense as your divers oxygen supply runs low, you may even hold your breath. Will you find a new supply of oxygen before it is to late? Nothing is random in this fantastic adventure.

Scene after scene of incredible graphics. Can you find your way through the caverns without losing your life in the perils of the deep? Down down down just watch your depth gauge and you will see how deep Atlantis goes. Can you survive at such breathtaking depths? Sharks are everywhere, swimming through the scenes turning, facing JAWS open wide, looking for their next meal, will it be you?

Oysters with precious pearls abound. As your diver takes the pearls they snap shut and he may lose another life. Giant Squid propel themselves along searching for another meal, will it be you?

Cavern after cavern of coral to explore on and on. ATLANTIS is so big it will take you ages to explore. Added to the fun is the SECRET OF ATLANTIS can you find it?

### Technical Information

INTRIGUE  
SOFTWARE

# BENEATH THE STARS

TEXAS  
TI-99/4A

A brilliant ZAP UP game FOR THE BASIC COMPUTER

SOFTWARE REVIEW from  
Games Computing January 1985

Alien type multi-digit hands are needed to keep up with the key pressing action demanded in this game. Nine keys are used to defend your space base from alien attack. You lose power if they damage your force field or if you bring your laser cannon or neutron gun into action. Help is at hand though in the shape of a repair craft, which can restore the force field and hence energy levels.

If more than one alien crashes into your generators you're finished. There are six types of alien to destroy, each with a different points score. There are five difficulty levels and the five highest scores are automatically recorded. Standard keys are set for playing, but these can be altered by selecting the appropriate menu option. Error checking is limited since the program is tightly squeezed into the TI memory, so take care in resetting keys or by pressing enter as default you could end up with a stuck game.

Only one key operates at a time, so the game has an infuriatingly high frustration quotient. In this respect the game is cleverly fashioned to give you so many things to think about that you don't worry about the typically jerky movement of the slow TI basic. All the while a lower screen display monitors your defence levels and score.

The packaging and instructions are to Intrigue's usual high standard. Slow TI basic or not, this is an altogether professional effort, giving very good value for money.

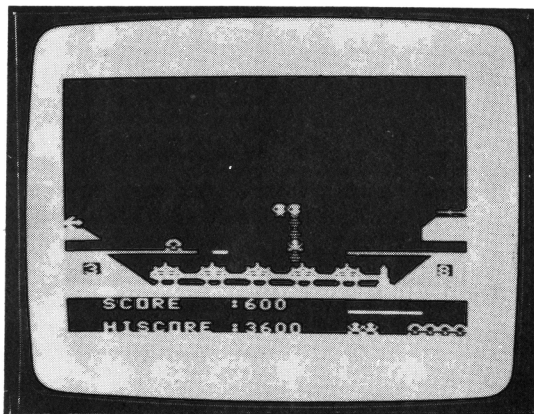

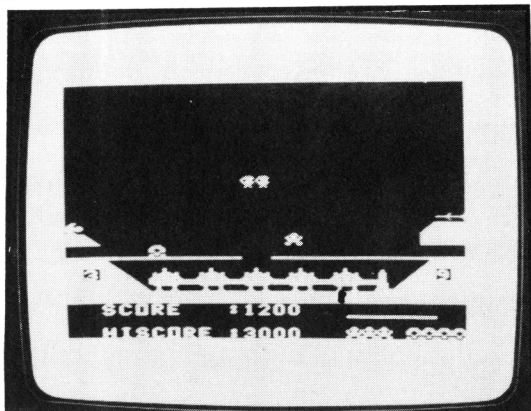

## FEATURES:

5 Skill levels.  
Animated space craft  
Select key option  
Hall of Fame  
Continuous Score and  
Hiscore display  
Full sound  
Even the missiles roar.

# ADVENTUREMANIA

This fascinating role playing adventure is set in the heart of London. You may chance your luck in the Gambling Casino. Can you find the Computer Room? Are the binoculars useful? How will you ever escape from the Dungeons or Hampstead Heath? Watch out for the Guards. Is there a Gunpowder plot. What are the passwords? And more and more... Can you discover the ULTIMATE QUEST

Adventuremania is fast playing using easy input commands.

FULL COLOUR AUDIO PACK \* A11 for just £5.95

## SOFTWARE REVIEW

### Adventuremania TI-99/4A £5.95

Intrigue Software, Cranbrook Road, Tenterden, Kent TN306UJ

This is a graphics adventure for the standard machine which not only provides a continual display of your status but shows a 3-dimensional outlook of your location.

Since the adventure is set in London, this includes some of the landmarks such as Trafalgar and Leicester Squares and the Strand.

You have a spectacular mission to accomplish, but you must first discover for yourself what this is.

The computer has been given a fairly limited vocabulary and your instructions are not input as complete words. The first three letters of the verb followed by the

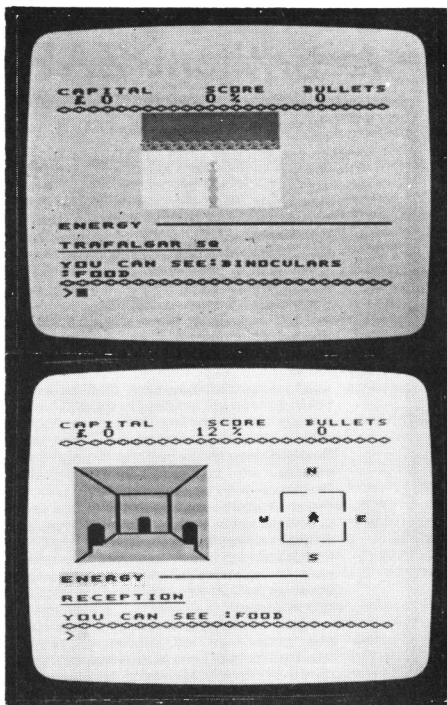

first three of a noun, with no space between, is the only format accepted.

This takes some getting used to at first, but eventually you see the advantages of not having to type out long sentences only to be greeted by "do not understand".

Adventuremania is not a difficult game to play. Unlike some adventures your progress is not impeded by cryptic clues that take hours to unravel.

The game usually ends as a result of your own misfortune and at least if you don't manage to complete it you do have a score, given as a percentage. For consolation. J.W.

|                 |     |
|-----------------|-----|
| instructions    | 80% |
| playability     | 75% |
| graphics        | 70% |
| value for money | 85% |

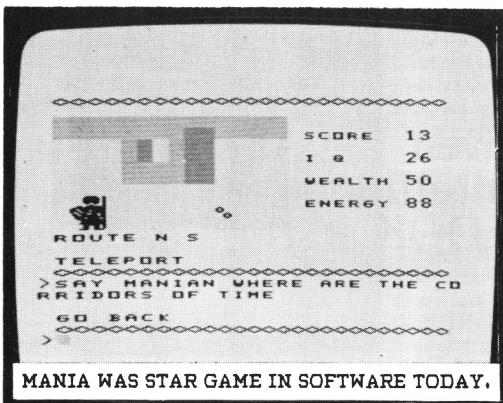

The only game chosen by Games Computing (on cassette) in the TOP 100 1984

# MANIA

Although Mania is part two of the Ultimate Quest you do not need to play Adventuremania first.

Mania is a very strange land through which you must travel looking for the Legend of the Ultimate Quest and the Corridors of Time. It will not be an easy journey as you will quickly discover.

MANIA WAS STAR GAME IN SOFTWARE TODAY.

## SOFTWARE REVIEW

### Mania TI-99/4A £5.95

Intrigue, Cranbrook Rd, Tenterden, Kent TN30 6UJ

A graphics and text adventure in which you escape the strange lands of Mania, in order to find the legend of the Ultimate Quest.

At the beginning of each move the screen displays your score, wealth, IQ and strength together with a graphic representation of your position and surrounding objects.

Although the graphics use the TI's facilities well, they don't equal the quality of those used in The Hobbit or Valhalla.

The pictures of your surroundings are rather small — about an eighth of a screen — but they are accurate, portraying 3D very well in those pictures where it is used.

Some backgrounds are used more than once, but the foreground objects are usually different.

There are 17 commands. The command "say" enables you to ask a question to the characters which you meet on your travels. These include wizards, Manians and serpents.

When you come across a nasty creature you can choose to fight it with any of the weapons that you have acquired along the way. I would certainly recommend Mania. J.J.

|                 |     |
|-----------------|-----|
| instructions    | 75% |
| playability     | 87% |
| graphics        | 85% |
| value for money | 90% |

This game features very special graphics. Even the characters and the objects are displayed in the pictures and although the game is in basic you can even ask the characters questions to which with limited artificial intelligence they will reply.

**Lionel and the Ladders**  
**TI-99/4A £7.95**

Intrigue, Cranbrook Rd, Tenterden, Kent TN30 6UJ

Another princess captured! But good old Lionel sets off to her rescue. His adventure takes him to a crumbling castle, where he explores by climbing ladders, jumping across holes in the floor — and on occasion, monsters.

Scattered through the castle are doors leading deeper into the maze. These are all locked, so Lionel must start by finding keys which, once taken, will be hidden again. After a door is opened it changes colour. If it changes to red, the door is an entrance only and cannot be re-entered.

All Lionel's movements must be carefully planned. A fear of heights means he can only climb up ladders, although a fall may prove a fortuitous escape, providing there's a floor to land on.

Lionel has only three lives, but can win a bonus life. Patience sometimes runs short, especially when Lionel is grabbed by a monster before even having the chance to start, or sometimes after landing safely on the floor he then falls right through it. Still, with a high enough score, there's consolation in the Hall of Fame. Needs Extended BASIC.
